1. Introduction

1. 1 Field of application

This document shall be used to secure correct installation of Benarx Cellular Glass XP with Spacers. The product inner side has attached rubber spacers (distance rings) which make an air gap between pipe and insulation.

This document serves as a reference document as it takes precedence over all corresponding project related documents describing installation of Benarx Cellular Glass XP with Spacers.

1. 2 Installation manual changes

Only Technology & Development Department by Beerenberg is entitled to make changes to this document.

1.3 Responsible

Individual operator who install the Benarx Cellular Glass XP distanced insulation system is responsible for following the installation procedure described in this document. The project manager is responsible for ensuring that the latest available revision of this document is made available and known to the workers involved.

1. 4 Definitions and abbreviations

Cellular Glass XP - Benarx Cellular Glass XP

Drain plug - Benarx Fire Plug
Flexiroll XP - Benarx Flexiroll XP
PFP - Passive Fire Protection

XP tightening band - Tightening band with glass fibre tape (on band's innermost side) and clips – for

Benarx Cellular Glass XP

XP - Pitt-Char XP

All metal materials used for fastening and installation of Benarx Cellular Glass XP with Spacers shall be of acid-proof stainless steel, type AISI 316L only.

1. 5 Informative references

2. Tools, Materials and Protective Equipment

Tools, components and accessories that is recommended for product installation.

2.1 Tool list

Item no.	Tools
1	Marker pen (type Pilot)
2	Numeric metre (length 3 meter)
3	Inch rule
4	Sheet metal shear, left hand
5	Sheet metal shear, right hand
6	Hand drill
7	Tightening tool
8	Locking plier, ¾"
9	Grip pliers
10	Cellular glass scrape (knife type "Mora")
11	Caulking gun
12	Compass saw
13	Pop tong (TT55)
14	Hole saw (22 mm)
15	Hammer (rubber type)
16	Stanley knife
17	Protractor
18	Compass
19	Handsaw
20	Coarse file

2.2 Accessory list

Item no.	Accessories	
1	Nitoseal SC N (white colour)	
2	Nitoseal SC 30 (red colour)	
3	RUKO Strip (fire gasket)	
4	Glass fibre tape (19 mm)	
5	Stainless steel tightening bands, (quality A4), ¾"	
6	Stainless steel clips (quality A4), ¾"	
7	Stainless pop rivets (type AISI 316L), 3,2 x 6 mm	
8	Drill bits Ø 3,3 mm (type Dormer)

2.3 Protective equipment list

Item no.	Protective equipment
1	Dust mask (P2 filter)
2	Gloves (cut secure / Kevlar fibre)
3	Safety overall
4	Safety eye wear
5	Safety shoes
6	Helmet

Notes:

1. Protective equipment shall be used in accordance with applicable health, safety and environmental requirements specified for the work place.

3. Clarification before procurement and start-up

A Beerenberg Services representative (technical responsible) shall clarify any start-ups in the event of pipe temperatures over 80°C.

Make sure that all insulation parts are intact in addition to be free from water, dew, ice and contaminants.

5. Implementation

Execution shall be implemented according to illustrations.

1a.

Sealing compound - Inside

Nitoseal SC 30 shall be used as sealing compounds on the inside due to possible high temperature exposure.

Area of use:

- 1) between insulation pipe sections
- 2) to glue rubber spacers to inner side of insulation pipe shells.

Nitoseal SC 30 has red colour.

1b.

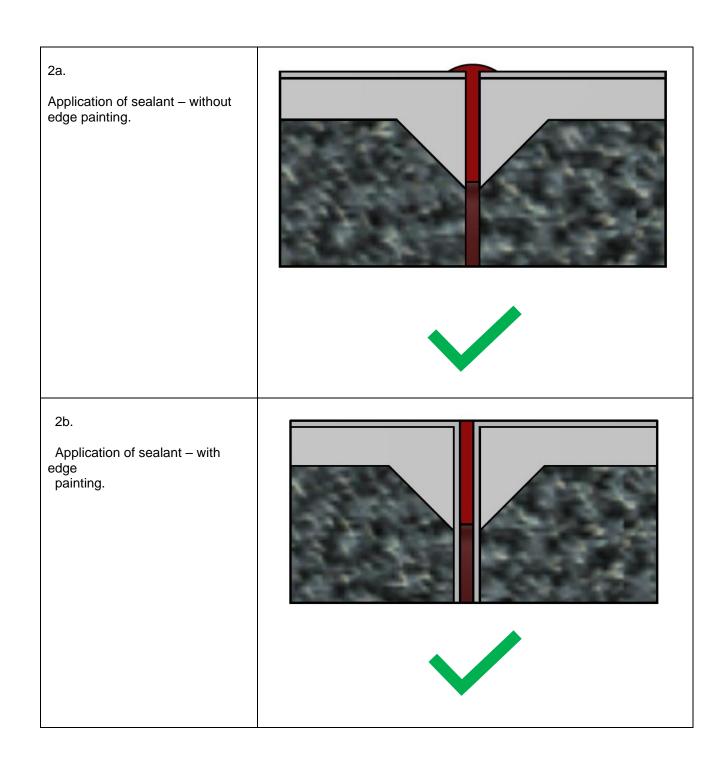

Sealing compound - Outside

Nitoseal SC N shall be used as sealing compound on joints on outer side of insulation pipe sections.

White colour shall be utilized unless otherwise is specified.

3.

Permanent tightening bands.

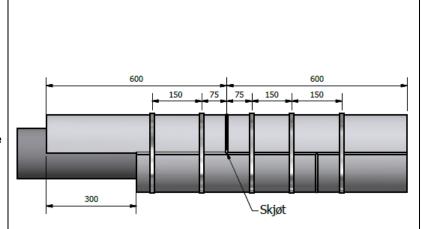

Measure and mark the correct placement of the tightening bands.

The preferred method is to install the XP tightening bands 75mm beside the circumferential joints.

The centre-to-centre distance of the XP tightening bands is always minimum 150mm.

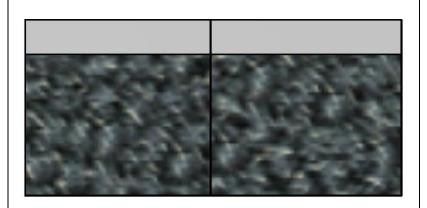

IMPORTANT

Do not overtighten XP tightening bands. Overtightening will cause top coat damages.

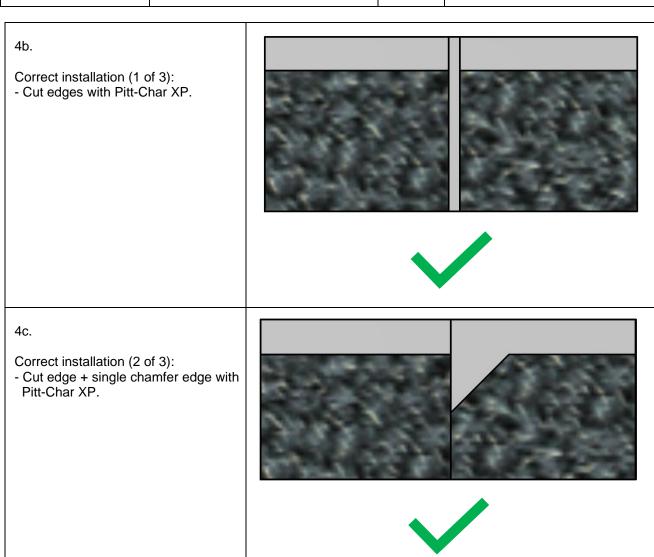

4a.

Incorrect installation – cut edges

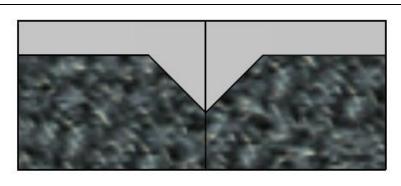

DEEREN BERG	Dokument nr. / Document no.: TECH-MA21-00562	Dato/ D	ate: 07.10.2019	Side / Page: Page 12

4d.

Correct installation (3 of 3):
- Double chamfer edge with Pitt-Char

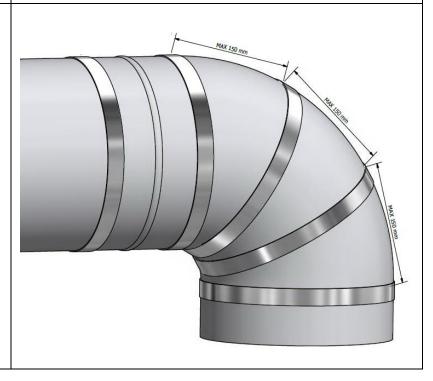

5.

Centre distance XP tightening bands.

XP tightening bands of type ¾" is installed with 150 mm distance (centre to centre).

DEEREN BERG	Dokument nr. / Document no.: TECH-MA21-00562	Dato/ D	ate: 07.10.2019	Side / Page: Page 14

Vedlegg til:	NA	Rev:	1.0	

6a.

Installation of T-piece with dissimilar pipe diameter.

Cut and adjust the vertical component to the horizontal pipe as illustrated.

During incidents where the dimension difference is small (1-2") the smallest dimension can be installed on the outside of the larger dimension.

DEEREN BERG	Dokument nr. / Document no.: TECH-MA21-00562	Dato/ D	ate: 07.10.2019	Side / Page: Page 15

Vedlegg til:	NA	Rev:	1.0	

Cutting of horizontal components for installation on the outside of vertical components.

Cut and adjust the first horizontal component to the vertical component.

7a.

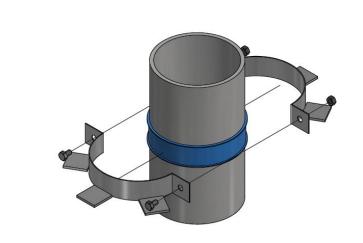

Installation of retaining ring on vertical pipe sections.

Alternative 1:

Fastening with bolts and nuts.

Note:

Gasket shall be installed on pipe in advance.

Vedlegg til:	NA	Rev:	1.0	

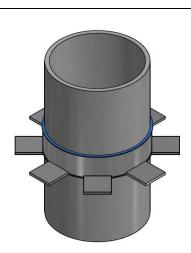

_	

Installation of retaining ring on vertical pipe sections.

Alternative 2:

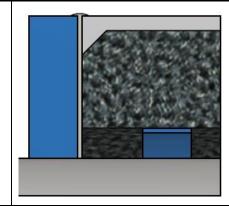

Fastening with tightening bands.

Gasket shall be installed on pipe in advance.

8a.

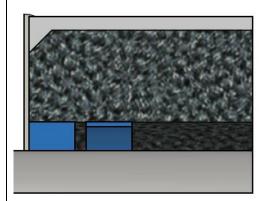

Correct installation (alternative 1 of 4): - Preformed end cap on outside.

8b.

Correct installation (alternative 2 of 4): - Preformed end cap on inside.

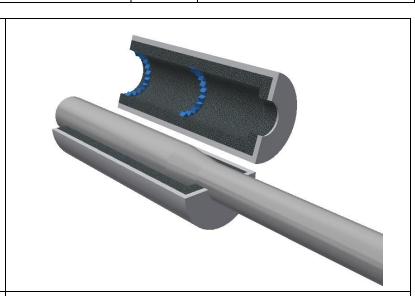

BEEREN BERG	Dokument nr. / Document no.: TECH-MA21-00562	Dato/ D	Pate: 07.10.2019	Side / Page: Page 17

Vedlegg til:	NA	Rev:	1.0	

11a.

Installation of Benarx Drain Plug on T-piece.

Note:

The plug's threaded bush is located on underside of steel plate with a threaded nut, while the threaded plain washer on top of the steel plate.

Steel plate is fastened to XP tightening bands.

DEEREN BERG	Dokument nr. / Document no.: TECH-MA21-00562	Dato/ Date: 07.10.2019		Side / Page: Page 21

Vedlegg til:	NA	Rev:	1.0	

11c.

Benarx Drain Plug should be situated away and into the insulation. Thereafter, fasten the XP tightening band according to ordinary procedures.

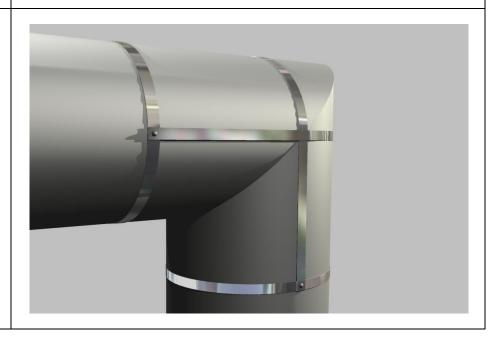

Apply Nitoseal SC N (white) on the steel plate, and in between the drain plug and insulation to secure a sealed connection.

12.

Installation of XP tightening band on angle bends.

XP tightening band is fastened with pop nails that is riveted flat (prior to installation).
